

**A good memory,
it is to be shared!**

STERCKEMAN-CARAVANS.COM

Trust in our experience

In 1945 with the war only just over, Alexandre Sterckeman built his first caravan in his Seclin workshop in northern France.

Thanks to the progress made in the field of motor vehicles and the introduction of paid holidays, caravans became an excellent means of holidaying in France.

Some 75 years later, **Sterckeman has become a major European brand and continues to delight thousands of caravanners throughout Europe.**

Your other holiday home

Lightweight and easy to tow

Today, Sterckeman provides **caravans that are easy to tow and boast a modern look with a full range of models:** from lightweight, inexpensive caravans to the most sophisticated models, from the 2-person version to a multi-generation model, you are sure to find the ideal solution for couples or families...

P 20 - 23

The fully equipped special series model

Sleeps up to 4 persons

The Tournon factory

Our caravans are designed and manufactured in Tournon-sur-Rhône in Ardèche (France).

One of the largest manufacturing sites in Europe with a surface area equivalent to 33 football pitches and producing more than 5000 caravans per year.

Our chassis, our cushions, our mattresses, and our furniture all come from specialist factories in France.

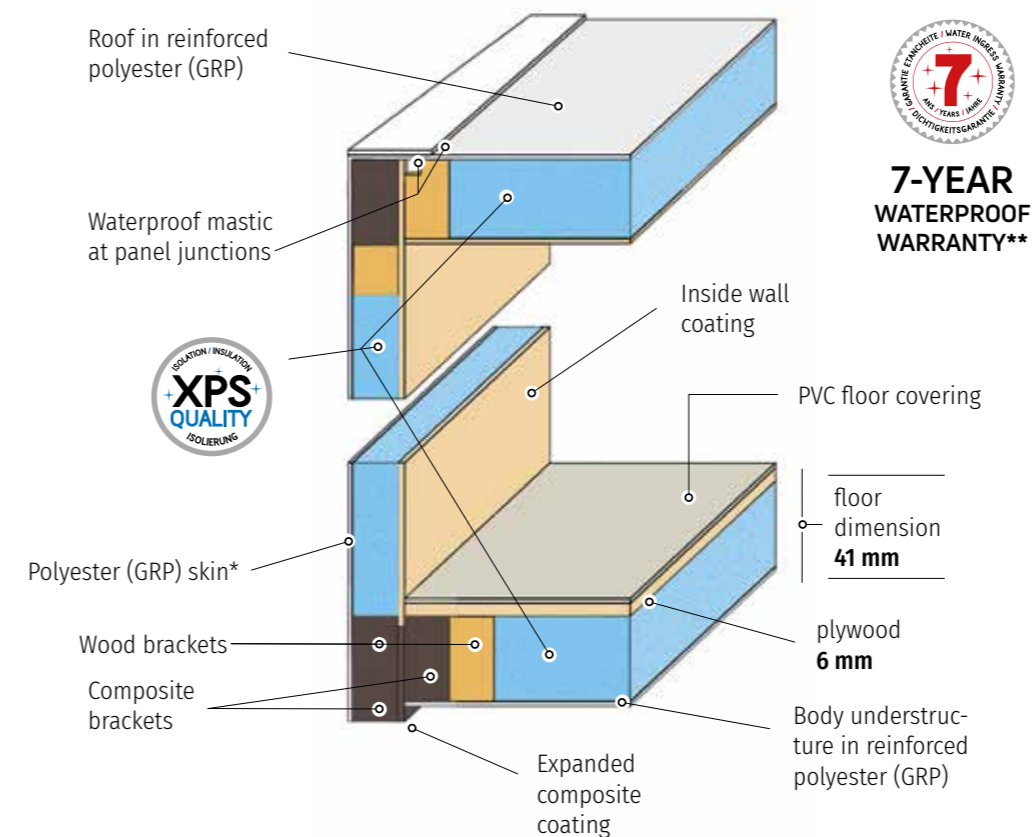

STERCKEMAN MANUFACTURE

THE ADVANTAGES STERCKEMAN

EXCLUSIVE CONSTRUCTION

IRP offers enhanced Insulation, improved Resistance and increased Protection.

*Aluminum side walls for standard versions of EASY models
**Subject to an annual inspection by an approved partner.

FOR ALL YEAR ROUND

XPS insulation, an extra-firm and stable hydrophobic foam offering excellent sound and heat insulation.

DURABILITY AND RESISTANCE

An effective combination of wood/composite which strengthens the framework of internal walls and floors, combining the durability of composite with the outstanding resistance of solid wood.

IN ANY WEATHER

Protection provided by a polyester skin*, offering enhanced resistance to scratches, small impacts, loose chippings, hydrocarbons, UV light and general bad weather.

TAKE THE PLUNGE WE TELL YOU EVERYTHING YOU NEED TO KNOW

1 CAN I USE MY CARAVAN ALL YEAR ROUND ?

All our caravans, FROM THE BASIC MODELS UPWARDS, are manufactured using a process that is unique on the market, called IRP.

The advantages provided by IRP are IMPROVED INSULATION, GREATER RESISTANCE and ENHANCED PROTECTION.

As a result, you can make the most of your caravan all year round.

Of course, depending on the use you make of it during the winter, you need to choose the right heating solution.

2 WHAT TYPE OF HEATING FOR MY CARAVAN ?

The type of heating will depend on what use you make of your caravan, and we provide a range of different high-performance heating systems:

- **GAS HEATING:** continuous and precise temperature regulation.
- **FORCED AIR:** uniform heat distribution.
- **ULTRAHEAT:** electrical resistance allowing double distribution of hot air and quick temperature increase.
- **UNDERFLOOR HEATING:** aesthetic, ergonomic and silent.
- **TRUMA iNET & iNET X:** remote control of heating and air-conditioning equipment.

3 IS MY CARAVAN ENTIRELY SELF-SUFFICIENT ?

Of course. All our caravans can be equipped with a battery or solar panel to make them self-sufficient in all circumstances.

All our caravans are also fitted with a WC and water tanks to complete this self-sufficiency.

4 WHAT TYPE OF CAR DO I NEED TO TOW A CARAVAN ?

We make every effort to develop and produce lightweight caravans that are easy to tow: this can be seen in the very DNA of STERCKEMAN.

As a result, you don't need an ultra-powerful car to be able to tow one of our caravans – that is one of our strengths!

5 ON THE MOTORWAY OR IN THE MOUNTAINS, WHAT IS THE RISK OF MY CARAVAN SWERVING ?

The secrets to good road holding are careful driving and a correctly loaded caravan. Nevertheless, yaw dampers and/or stabilisers can be added to your caravan if they are not fitted as standard.

Always remember that the load inside the caravan should be properly distributed before you set off.
