### TRUMA COMBI 6E

**This combines the heating and water heater functions in a single appliance.**

The Truma Combi 6E is a powerful warm air heater (6000 W) with integrated hot water generator.

It allows the heating to be run in gas mode, electricity mode, or combi mode. For use when stationary at the campsite, you can run the Combi heating with the 12 V transformer without using the onboard power supply.

### TRUMA I-NET X

**Control the heating and air conditioning from the application on your smartphone.**

The Truma iNet X is a central control unit that networks the Truma appliances in the caravan.

The iNet X can be used to control the Truma Combi heating and/or air conditioning remotely with a smartphone or tablet, wherever the user is, and can also check the gas level.

## TAKE THE PLUNGE

WE TELL YOU EVERYTHING  
YOU NEED TO KNOW

1

### CAN I USE MY CARAVAN ALL YEAR ROUND ?

All our caravans, FROM THE BASIC MODELS UPWARDS, are manufactured using a process that is unique on the market, called IRP.

The advantages provided by IRP are IMPROVED INSULATION, GREATER RESISTANCE and ENHANCED PROTECTION. As a result, you can make the most of your caravan all year round. Of course, depending on the use you make of it during the winter, you need to choose the right heating solution.

2

### WHAT TYPE OF HEATING FOR MY CARAVAN ?

- **GAS HEATING:** continuous and precise temperature regulation.
- **FORCED AIR:** uniform heat distribution.
- **UNDERFLOOR HEATING:** aesthetic, ergonomic\* and silent.
- **TRUMA iNET & iNET X:** remote control of heating and air-conditioning equipment.

### 3 IS MY CARAVAN ENTIRELY SELF-SUFFICIENT ?

Of course. All our caravans can be equipped with a battery or solar panel to make them self-sufficient in all circumstances.

All our caravans are also fitted with a WC and water tanks to complete this self-sufficiency.

---

### 4 WHAT TYPE OF CAR DO I NEED TO TOW A CARAVAN ?

We make every effort to develop and produce lightweight caravans that are easy to tow: this can be seen in the very DNA of STERCKEMAN.

As a result, you don't need an ultra-powerful car to be able to tow one of our caravans – that is one of our strengths!

---

### 5 ON THE MOTORWAY OR IN THE MOUNTAINS, WHAT IS THE RISK OF MY CARAVAN SWERVING ?

The secrets to good road holding are careful driving and a correctly loaded caravan.

Nevertheless, yaw dampers and/or stabilisers can be added to your caravan if they are not fitted as standard.

Always remember that the load inside the caravan should be properly distributed before you set off.

Want to learn more about the advantages of your future caravan?
